SUMMARY

Self-driven and hardworking individual, who loves to write clean code and continuously learn. Having the background of Art & Design which I took in both GCSE and college, was when I started to get fascinated in how things came together. I have strong knowledge in HTML, CSS and JavaScript which is demonstrated through my projects which can be viewed in my portfolio. My journey started with a web development course, then later had an opportunity to develop my skills in a software engineering bootcamp. Ever since I've been able to drastically increase the pace of my learning and now I'm seeking a position where I can develop my skillset in a professional environment.

Portfolio: raihed101.github.io

LANGUAGES/ FRAMEWORKS

•HTML •CSS •JAVASCRIPT •BOOTSTRAP •GIT/ GITHUB •LINUX

EXPERIENCE/ EDUCATION

- 2020 - 2020 ○ **Morgan Stanley & Amplify Trading Virtual Simulation**
The Morgan Stanley & Amplify Trading Event Simulation is a state-of-the-art simulation in which I have experienced roles in market making, sales trading and execution trading. During the simulation, I learnt what it is to be a sales trader using client relationship ability to facilitate client flow and as a market maker, we had to deliver prices and use the exchange and inter-dealer brokers to unwind risk.
- 2020 - 2020 ○ **Tech Talent Accelerator - Generation & Whitehat**
This programme was an amazing experience, it has broadened my knowledge in all areas of tech. I had sessions on the employability skills and growth mindset has really set me up for success. The content of the course covered HTML, CSS, JavaScript, Bootstrap and Linux. I also learnt new concepts through implementing in projects in an agile environment with my team. With the programme being completed next steps is to continue learning and join an organisation where I can provide value.
- 2018 - 2020 ○ **Leyton Sixth Form College**
During the last 2 years of college I have studied Art & Design Level 3 specialising in Graphic Design and 3D Design. I had come across coding during this time and I made a commitment to myself, which was to break into the field of software engineering. I've been learning ever since.
- 2018 - 2019 ○ **Wilko Hardware Store Ltd**
Working at Wilko I would serve and build rapport with customers, as well as help with any enquires on products. I would also work with my team to maintain a positive working environment, so everyone has a pleasant experience at Wilko.
- 2013 - 2018 ○ **Bow School**
Achieved 6 GCSE'S (6 -5), (B - C) inc Maths & English

PROJECTS

- Built a Task Planner with HTML, CSS, Javascript & Bootstrap.
<https://task-planner101.netlify.app>
- Secret Messaging App, Built with HTML, CSS, Javascript & Materialize.
<https://secret-message-app-sigma.vercel.app/>

INTERESTS

Outside of coding I spend my time in the gym, I like to train 4x a week in either the gym or boxing. I also spend time with family/ friends as well as working on personal projects in it being graphic design or programming.
